I can't tell if other radios have that zener problem. My other 2 are  
Icom HTs. Just take a minute to call Icom and ask them, I'm sure  
you will get a correct answer quickly. -pat

Subject: Kenwood 742 Questions

To: ham-equip@ucsd.edu

A friend of mine just bought a Kenwood 742 and is having some difficulty finding special uses for it. He asked me to post this to find out any special functions the radio does or has besides what might be found in the owner's manual. For example, he thought that it might be possible to do remote access into the radio from another radio. If anyone knows any special features of the radio, please e-mail me with any possibilities. Or, my friend's Compuserve mailing address is: 70304,2575. Thanks much!

Thanks for all the responses on the aluminum tower and control box. The manufacturer of the tower is Heights and I have received a Ham-M control box.

Thanks to all who responded about my Yaesu 470 HT. I have lots of mods for it, and now I can receive on a quite larger bandwidth. Thanks for all your help..
